O NAMA

„Cetinka“ d.o.o. sa sedištem u Vršcu uspešno posluje i širi svoje poslovne aktivnosti još od 2005. godine. „Cetinka ambalaža“ d.o.o. počela je kao pogon polimerne ambalaže u Jasenovu i puštena je u rad 1988. godine, u okviru Hemofarm koncerna. Od 2005. godine posluje samostalno kao Centar Millennium A.D Vršac. Sredinom 2006. godine, Centar Millennium A.D širi svoju delatnost otvaranjem pogona offset štampe. Dana 10.10.2011. dolazi do odvajanja od Centra Millennium A.D Vršac u Millennium proizvodnju d.o.o. Jasenovo. U avgustu 2012. godine izvršena je vlasnička transformacija (privatizacija), a od 01.01.2014. posluje pod imenom „Cetinka ambalaža“ d.o.o. Uspeh u poslovanju ove dve firme sa dugom tradicijom grade poverenjem velikog broja postojećih i sticanjem poverenja novih kupaca, nudeći u svakom trenutku visok kvalitet i veliki assortiman PVC i PET folija, različite polimerne ambalaže od PVC, PET i PS folije, kartonskih komercijalnih kutija i usluga štampe, uz poštovanje ugovorenih rokova i politiku niskih prodajnih cena.

„Cetinka“ d.o.o. je specijalizovana firma za trgovinu tvrdom PVC i PET folijom koja uspešno posluje na teritoriji Srbije i zemalja u okruženju. Za deceniju poslovanja „Cetinka“ d.o.o. je postala lider u trgovini folijom i stekla poverenje velikog broja firmi, pre svega iz farmaceutske, prehrambene i mašinske industrije, kao i mnogih drugih. „Cetinka“ d.o.o. je direktni zastupnik dve vodeće renomirane firme iz EU, koje se bave proizvodnjom PVC i PET folije, čime garantujemo evropske standarde, najviši kvalitet i najniže cene folije na našem tržištu.

„Cetinka ambalaža“ d.o.o. je specijalizovana za proizvodnju polimerne ambalaže od PVC, PET i PS folije. Raznim tehnologijama, termoformiranjem, ultrazvučnim varenjem, varenjem visokom frekvencijom realizujemo projekte od ideje do gotovog proizvoda. Za neke oblike polimerne ambalaže mi smo jedini proizvođači u našoj zemlji, a velika prednost je mogućnost izrade ambalaže po tačnim merama za svaki konkretan proizvod, transparentnost folije od koje se ambalaža izrađuje (tako da upakovani proizvodi ostaju vidljivi za kupce). Moguće je kombinovanje folija različitih boja za izradu ambalaže i štampa na njoj. Nudimo i kvalitetne kartonske komercijalne kutije za pakovanje uz kristalno jasnu štampu i mogućnost dorade u knjigoveznici. Nudimo i uslugu štampe svih oblika reklamnog materijala (kalendara, flajera, plakata, brošura, ukrasnih kesa, knjiga, upaljača, olovaka...). U 2014. godini uvedeni su standardi ISO 9001:2008 čime je kvalitet poslovanja i pružanja usluga podignut na najviši nivo.

ABOUT US

“Cetinka” Ltd. headquartered in Vršac successfully is operating and expanding its business activities since 2005. “Cetinka ambalaža” Ltd. started as a plant for polymeric packaging in Jasenovo and it was put into operation in 1988. as part of Hemofarm Group. Since 2005., “Cetinka ambalaža” Ltd. operates independently as “Millennium Centar” Inc. Vršac. In mid-2006, “Millennium Centar” has expanded its business by opening offset printing. In 10.10.2011. “Millennium Centar proizvodnja” Ltd. Jasenovo was separated from “Millennium Centar” Inc. Vršac. In August 2012, the ownership transformation (privatization) was made and from 01.01.2014. it operates under the name “Cetinka ambalaža” Ltd. Success in business, these two companies are achieving with building confidence of a large number of existing and gaining the trust of new customers, offering at any time, high quality and a large range of PVC and PET foils, various polymeric packaging of PVC, PET and PS foils, cardboard boxes and commercial printing services, also fully respecting deadlines and policy of low sales prices.

“Cetinka” Ltd. is a company specialized in trading hard PVC and PET foils which was established on the territory of Serbia and neighboring countries. Throughout a decade of business, “Cetinka” Ltd. has become a leader in the sale of foil and gained the trust of many companies, primarily in the pharmaceutical, food and mechanical industries, as well as many others. “Cetinka” Ltd. is the direct representative of the two leading renowned companies in the EU, which are engaged in the production of PVC and PET foils. This is certain guarantee of European standards, highest quality and lowest price foil on the market.

“Cetinka ambalaza” Ltd. is specialized in the production of polymeric packaging of PVC, PET and PS foils. We can successfully realize complete project from idea to finished product with use of various technologies like thermoforming, ultrasonic welding, high frequency welding, etc. For some types of polymer packaging, we are the only manufacturers in whole our country, and also we consider as the great advantage our ability to create packaging by exact measures for each specific product with high transparency of the used foil (so that packaged products remain visible to the customers). It is possible to combine foils of different color for packaging and printing on it. We also offer commercial quality cardboard boxes with sharp visible printing and also with possibility of refined refinishing in a bindery. We also offer printing of all forms of advertising material (calendars, flyers, posters, brochures, paper bags, books, lighters, pens...). Since 2014. we are having certification ISO 9001: 2008, so the quality of operations and service delivery are raised to the highest level.

FOLIJA FOIL

PET (polyethylene terephthalate) folije poseduju perfektnu transparentnost, visoki sjaj i dobra mehanička svojstva, što ih čini najpouzdanijim materijalom za pakovanje. Jedna od važnih osobina PET folija je i mogućnost reciklaže. Odlična su podloga za štampu. PET folija poseduje veliku mehaničku snagu, čvrstoću i tvrdoću, dobru rastegljivost i sposobnost zavarivanja i izuzetnu dimenzionalnu stabilnost. PET proizvodi su odobreni za upotrebu sa prehrambenim proizvodima.

PVC (polyvinyl chloride) folije su izuzetno transparentne, visokog sjaja i ravne površine. Visoka hemijska otpornost, jednostavnost termo-formiranja i dubokog izvlačenja, kao i laka mašinska obrada (savijanje, sečenje...) omogućuju im široku upotrebu u industriji ambalaže, uključujući i pakovanje prehrambenih proizvoda.

PET (polyethylene terephthalate) foils have a perfect transparency, high gloss and good mechanical properties, which making them the most reliable material for packaging. One important feature of PET foil is the possibility of recycling. They are excellent substrates for printing. PET foils possess high mechanical strength, stiffness and hardness, good ductility and good welding ability with excellent dimensional stability. PET products have been approved for safety use with food.

PVC (polyvinyl chloride) films are highly transparent, high-gloss and flat surfaces. High chemical resistance, ease of thermo-forming and deep drawing, as well as easy machining processing (bending, cutting...) allow their widespread use in the packaging industry, including food packaging.

BLISTERI BLISTERS

Blistere i podloške izrađujemo termo-formiranjem od PVC i PET transparentne folije ili folije u određenoj boji i debljini prema zahtevima kupaca. Najveću primenu imaju u farmaceutskoj i mašinskoj industriji kao i za firme koje se bave proizvodnjom školskog pribora.

Blisters and washers are made of thermoforming PVC and PET transparent foils; also they can be made of foil of a certain color and thickness customized according to the customer requirements. The widest application is in the pharmaceutical and mechanical industries, as well as in the companies engaged in the production of school supplies.

DOZNE CYLINDRICAL BOXES

Dozne ili cilindrične posude se proizvode iz rolne transparentne PVC folije u različitim debjinama, čime se formira cilindar raznih prečnika i visina. Dozne se proizvode u prečnicima od 60mm do 200mm sa formiranim rubom na krajevima cilindra, čime se postiže veća čvrstina dozne. Na doznama je moguća štampa u jednoj boji sito tehnikom. Dozna može da ima ukrasni kanap u boji po želji, koji služi kao ručka za nošenje. Imaju veliku primenu u prehrabeno-konditorskoj industriji za pakovanje pralina, žvaka, lizalica, grisina, čokoladica, čokoladnih figurica i mnogih drugih proizvoda u rinfuzu, u tekstilnoj industriji za pakovanje peškira, majica, donjeg veša, stolnjaka i mnogih drugih tekstilnih proizvoda. Dozne su pogodne i za pakovanje suvenira, olovki, kaiševa ali i mnogih drugih proizvoda u skladu sa vašim potrebama.

Cylindrical boxes are manufactured from a roll of transparent PVC foil in various thicknesses, thereby forming a cylinder of various diameters and heights. Cylindrical boxes are manufactured in diameters from 60mm to 200mm with shaped edge at the ends of the cylinder, resulting in a higher rigor. We are offering a possibility of screen printing on cylindrical boxes. They can also have a decorative rope in the color of your choice, which serves as a carrying handle. They have huge utilization in the food-confectionery industry for packaging of pralines, chewing gums, lollipops, breadsticks, chocolate bars, chocolate figurines and many other products in raw. They are also used in the textile industry for packing towels, shirts, underwear, tablecloths and many other textile products. Cylindrical boxes are suitable for packing souvenirs, pens, belts and many other products according to your needs.

DOZNE ELIPSE PRESSED CYLINDRICAL BOXES

Kao posebna vrsta proizvoda, naš asortiman upotpunjuje i dozna elipsa, koja se proizvodi u kombinaciji transparentne i PVC folije u boji različite debljine, raznih visina, dok širina može biti 95mm ili 125mm. Dozne elipse imaju široku primenu u modnoj, tekstilnoj i prehrambenoj industriji, industriji igračaka i slično.

As a special kind of products, our range is enriched with pressed cylindrical box, which is produced by the combination of transparent and colored PVC foils of different thicknesses and different heights, while the width can be 95mm or 125mm. Pressed cylindrical boxes are widely used in fashion, textile, food and toys industry.

LADICE ZA LEŽAJEVE TRAY BEARINGS

Proizvodimo ladice za sve vrste ležajeva u industriji automobila i kamiona kao i za sve ostale ležajeve i druge delove u mašinskoj i drugim industrijama. Trenutno proizvodimo ladice za ležajeve za Volvo, Renault, Ford i još neke kooperante.

We produce trays for all kinds of bearings mainly for use in the industry of cars and trucks, but also for all other bearings and other parts in mechanical and other industries. We currently produce trays bearings for Volvo, Renault, Ford and some subcontractors.

KADICE ZA KONDITORE TUB FOR SWEETS

Proizvodimo veoma kvalitetne kadice i podloške od braon i transparentne PVC, PET i PS folije za konditorsku industriju. Kadice i podloške se rade od folija različitih debljina i po dimenzijama i obliku koje sam kupac zahteva. Ukazano poverenje za izradu kadica i decenija iskustva u tom poslu garantuju kvalitet naših kadica i podloški za praline, bombonjere i slično. Posedujemo preko 150 vrsta alata za izradu kadica. Ukoliko se opredelite za neki od njih, značajno ćete umanjiti startne troškove za samu cenu izrade alata.

We produce superior in quality tubs for sweets and washers in brown and transparent PVC, PET and PS foils for confectionery industry. Tubbs and washers are made of foils of different thickness and size and shape, all according to the customer's needs. The built confidence in us and decades of experience in the business, guarantees the quality of our tubs and washer for pralines, chocolates and similar. Our company own more than 150 different types of tools for the tub. If you choose one of them, you will significantly reduce start-up costs for the actual cost of producing tools.

UKRASNE KUTIJE DECORATIVE BOXES

Ukrasne kutije proizvodimo u kombinaciji transparentne, braon i zlatne PVC i PET folije sa ili bez podloške, prema zahtevima kupaca. Primena ovih kutija je uglavnom u konditorskoj industriji ali možemo proizvesti ovaj vid ambalaže prilagođen za svaki pojedinačni proizvod prema vašim zahtevima i za proizvode iz svih industrija.

Decorative boxes are produced in combination of transparent, brown and gold PVC and PET foils with or without plates, all according to customer requests. Utilization of these boxes is mainly in the confectionery industry, but we can produce this kind of packaging tailored for each individual product according to your requirements and for products from all industries.

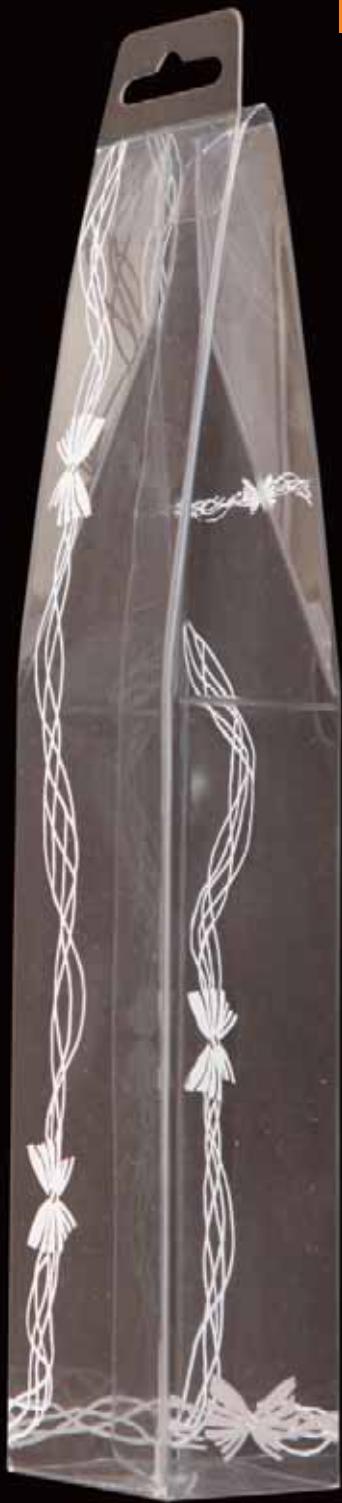

SLOŽIVE KUTIJE FOLDING BOXES

Složive kutije proizvode se od providne PVC folije u dimenzijsama od 30x30x30mm do 250x100x100mm. Na složivim kutijama po želji kupca možemo uraditi štampu. Koriste se za pakovanje u tekstilnoj i prehrambenoj industriji kao i za pakovanje raznih krema, sapuna, privezaka, suvenira, odevnih modnih predmeta i slično.

Folding boxes are manufactured from transparent PVC foil with dimensions of 30x30x30mm up to 250x100x100mm. On the folding boxes, we can also do printing, per customer request. They are used for packaging in the textile and food industries as well as for packing various creams, soaps, pendants, souvenirs, clothing fashion items and similar.

KVADRATNE KUTIJE SQUARE BOXES

Kvadratne kutije izrađujemo u dimenzijama od 80x80x25mm pa do 400x400x100mm, sa mogućnošću štampe sito tehnikom. Ove kutije se proizvode od transparentne PVC folije različite debljine i omogućuju dobru vidljivost upakovanog proizvoda. Poklopac kutije je velik koliko i sama kutija tako da omogućava lak pristup proizvodu. Korisnici ovih proizvoda su iz prehrambene industrije (za pakovanje želea, kolača, lizalica, žvaka...), iz tekstilne industrije (za pakovanje košulja, stolnjaka, posteljine, majica, čarapa, baby konfekcije...), ali i mnoge firme iz drugih branši.

Square boxes are produced in various sizes from 80x80x25mm up to 400x400x100mm, with the possibility of screen printing on them. These boxes are made of transparent PVC foil of various thicknesses and provide good visibility of the packaged product. The lid of the box is as large as the box itself, so this allows easy access to the product. Users of these products are from the food industry (for packing jelly, cakes, lollipops, chewing gum...), textile industry (for packing shirts, tablecloths, linen, shirts, socks, baby confection...), and many more companies from the other branches.

POKLOPCI COVERS

Poklopce izrađujemo od PVC i PET folije raznih debljina. Najčešće se koriste za pakovanje u prehrambenoj industriji.

Covers are made of PVC and PET foils with different thicknesses. They are mostly used for packaging in the food industry.

KARTONSKE KOMERCIJALNE KUTIJE CARDBOARD COMMERCIAL BOXES

Proizvodimo i štampamo kartonske komercijalne kutije za pakovanje proizvoda različitih oblika i karakteristika. Kontaktirajte nas i proizvešćemo za Vas kvalitetnu kutiju po niskoj ceni i po vašim zahtevima.

We produce and print commercial cardboard boxes for packaging products of different shapes and characteristics. Contact us and we will answer to your needs with producing for you boxes of high quality at low price range and according to your requirements and specification.

ŠTAMPA PRINT

U okviru "Cetinka ambalaže" d.o.o. je i pogon ofset, sito i tampon štampe.

Ofset štampa je idealna za veće tiraže jer pruža odličan odnos kvaliteta i cene finalnog proizvoda. Štampamo sve vrste reklamnog materijala od brošura, kataloga, vizit karti, flajera, postera, memoranduma, fascikla, kesa pa sve do kartonske ambalaže, rokovnika, kalendara, udžbenika, knjiga...

Sito štampa je tehnika kojom je moguće ostvariti otisak na gotovo svim predmetima sa ravnom površinom. Pogodna je za štampu na plastici, drvetu, keramici i sličnim podlogama raznih oblika i namena. Posebnu primenu nalazi u tekstilnoj industriji za štampu najraznovrsnijih materijala.

Tampon štampa je tehnika kojom je moguće ostvariti otisak na svim vrstama reklamnog materijala (olovke, upaljači, privesci USB memorije i sl.).

Within the "Cetinka ambalaza" Ltd., there are offset, screen and pad types of printing.

Offset printing is ideal for larger print runs, as it provides excellent ratio of value and the price of the final product. We print all kinds of advertising material like brochures, catalogs, business cards, flyers, posters, letterheads, folders, cardboard packaging, diaries, calendars, books...

Screen printing is a technique that make possible to print on almost all subjects with a flat surface can be achieved. It is suitable for printing on plastic, wood, ceramics and similar substrates of various shapes and uses. This kind of printing has special use in the textile industry for printing on various materials.

Pad printing is a technique with whom imprint can be achieved on all types of advertising materials (pens, lighters, key USB memory, etc.).

The image shows a white booklet standing upright on the left and two wine bags standing upright on the right. The booklet features a circular logo at the top with a landscape scene and Cyrillic text around it. Below the logo, the text "Општина Вршац" is written. The central part of the booklet has the text "у фокусу Вршац" above a pair of sunglasses, and "твој потез!" below a grid of small images. At the bottom, there is a large graphic of a newspaper with the word "VRŠAC" printed on it. The two wine bags on the right are green and purple. The green bag has the text "Уас је Вршац" written vertically in pink. The purple bag features a large illustration of a wine glass.
